Dan,

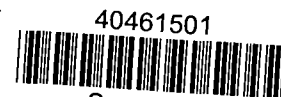

These talkers look good. When giving the rad background, please remember to stick with layman's terms or layman's explanation. This meeting is a good opportunity for us to get good messages out to the public that is concerned over this issue.

Agree with mention of the official letter and with pledging to send information to whoever asks for it. Don't think you need to be weighted down with handouts.

I am certain you will acquit yourself and and reflect good credit on the professionalism and conscientious approach of Region 7.
